Over Seas

# Why Over<span style="color:orange">seas</span> Lone Worker App?

**The app supports lone and remote workers with unparalleled emergency support**

Overseas Lone Worker Mobile App, it helps employers monitor the safety and well-being of employees anywhere in the site. And unlike other lone worker safety apps for smartphones or tablets, employees do not need to wear a separate man down pendant or carry a separate SOS device.

# INTRODUCTION

## 1.Accident        2.Rescue

Our lone worker app. It deploys two key technologies: Global Positioning System (GPS) and Global System for Mobile Communications (GSM). Together, these enable the Alarm Receiving Centre (ARC) to locate a lone worker and communicate with them via Safe Hub in the event of an emergency. They can easily detect worker location
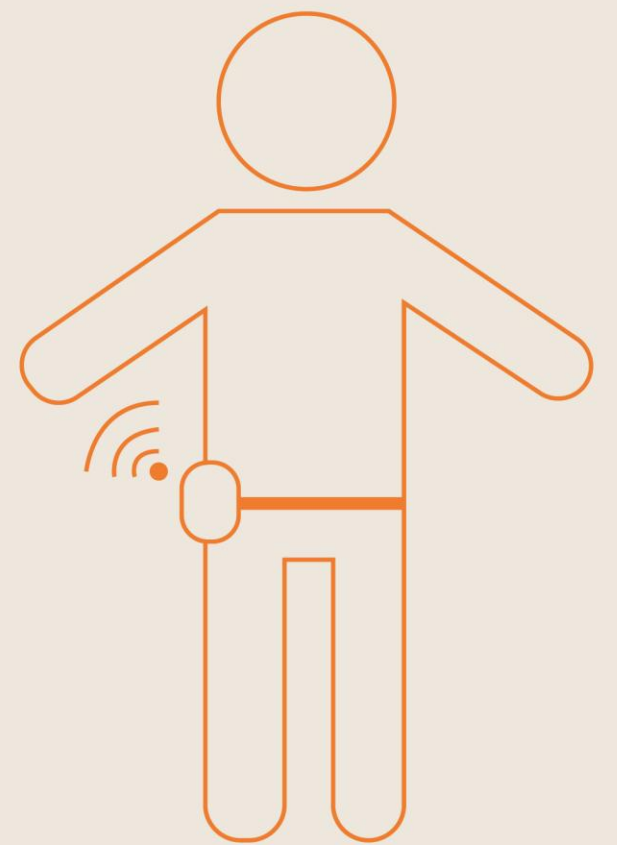

**plus:**

1. App in Android and IOS

2. Easy to use

3. Installed at Lone worker only and no need to get installed at notified safety team work

4. System will allow to start a new task with adding number of notified list with Mobile number and Email is optional

5. Within None-moved to specific second or minutes system will send SMS/Email with location text and map location with worker info.

# What is Over*seas* Lone Worker App?

Downloaded onto a smartphone or tablet, lone worker apps provide employees who work alone with a tool to signal for help in an emergency. Many lone worker apps also track employees GPS location, allowing employers to manage alerts, send help in an emergency, and effectively monitor their lone worker's safety.

Unlike lone worker devices, lone worker apps are able to utilize the functionality of operating systems like Android, to offer some of the best tech available to the consumer market. Plus, when an operating system rolls out an update, apps can utilize any new technology and remotely provide updates of their own.

## Project details

## Scope of work:

Overseas lone worker safety app can function as an emergency app or an all-in-one check in app. Complete with an easy setup and operation, man down alerts and other safety monitoring alerts, you can protect employees that work alone or at isolated sites where there`s reliable cellular coverage.
